GUARD
PATROLLING MANAGEMENT

IMPROVE YOUR PREMISES SECURITY & ENGAGEMENT

Routes, Checkpoints & GPS Tracking
Guards on duty clock-in with NFC Technology and GPS Tracking on App.

Job Orders
Guards can receive ad-hoc requests during the tour.

Report Incidents
Guards can report incidents complete with photo and voice message instantly.

Emergency Contact
List security supervisors or person-in-charge for an emergency.

Panic Button
Send notification to emergency contact persons when it is triggered.

Offline Mode
Record patrolling data in offline mode. Data will sync once the connection is reestablished.

Notification Alert
Receive notification alert if guards are late or too early for each checkpoint.

Checkpoints Engagement
Pre-set a question for each checkpoint for the guard to answer upon checking in.
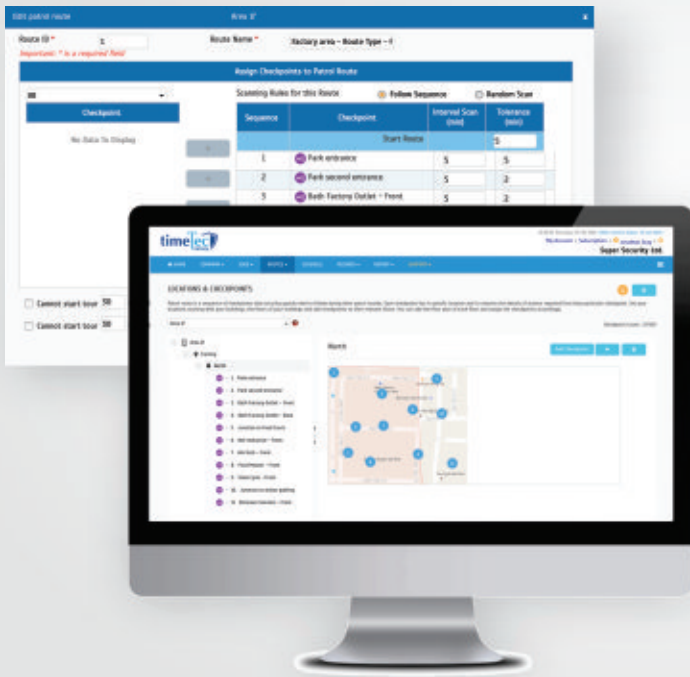

PATROLLING IoT HARDWARE

Rugged device

Beacon (Checkpoint)

NFC Tags (Checkpoint)

SIMPLIFY PATROL MANAGEMENT

Routes & Checkpoints Setup
Set a fixed patrol route for guards or request to patrol at random routes.

Tardiness Settings
Set a range for guards or receive alerts if guard patrol out of scheduled time.

Incident Management
Manage each incident and assign a different PIC for different matters.

Geo Fencing
Alert supervisor when the guards are outside of the area.

Real-time Monitoring Dashboard
Get all details in real-time, track guards and patrol records anytime, anywhere.

Manage Security Guards & Employees
Manage guards accessibility and hierarchy.

ADVANCED REPORTING & PATROLLING DATA

10+ Patrol Reports
More than ten automated reports, showing the data you require.

Patrol Schedule Details
Stores each clocking data even if the check-in is accidental.

Data Audit List
No alteration of the patrol records allowed, and edited records by the admins stand out.
